125 L

#### Quality improvement

- Integral pressed hoses are used for radiator oil return pipeline instead of steel pipes and fabric hoses combination, prevent from oil leaking.
- Two-stage back pressure system is adopted to ensure stable back pressure of oil compensation circuit, and increase slewing motor's durability.

▲ Two-stage back pressure design

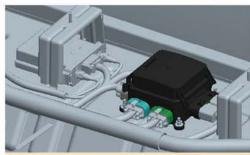

▲ Integral pressed hoses

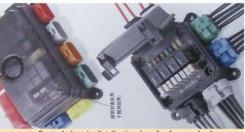

▲ High torque traveling motor

## **High Quality Electrical System**

 Electric wire is compliance with Japanese standard of automobile with excellent oil, fire, heat resistance, and mechanical property, meet with IP65 of electrical protection grade.

▲ Key electric parts are installed inside cabin, easily accessed and well protected.

Central electric distribution box for fuse and relay integrated installing, easy for maintenance.

◆ DT type connector clip with better water-proof and more reliable.

▲ Stereo radio with USB connector.

▲ Work in high temperature and high humidity conditions

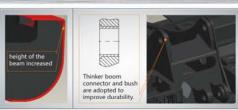

▲ Work in plateau and high strength conditions.

• Chassis frame is upgraded from "H" to "X", increase the strength and rigidity.

· High strength chassis structure.

• Height of the platform increased 33% to enhance the capacity of anti-bending and anti-torque as well as reducing the vibration of the cabin.

▲ Work in low temperature and cold conditions.

## High strength cabin structure

• ROPS/FOPS certified cabin

## Luxury cabin

 Improved colorful monitor with higher resolution, better color saturation, wider screen.

 Reliable electric Safety Valve, easy to operate.

#### Low noise level

- Modal analysis, fan optimization, composite material technology are adopted to reduce work noise level
- Sound quality has been optimized to enhance ear comfort, as well as lowing the noise level
- Noise value is lower than Chinese National Noise Control Standard.

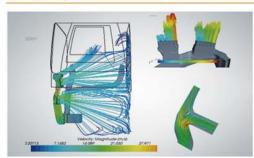

Comfortable suspension seat.
Separate design for the

control box and the seat

#### Powerful A/C

CFD value analysis is adopted to simulate A/C tuyere and duct, which ensure optimal blowing performance. A/C refrigeration output is increased by 19%, air blowing volume is increased by

▲ Face blowing vent

▲ Foot blowing vent

Steel plate pressed forming is adopted for engine hood.

· Standard working lamp on boom.

## **Excellent accessibility**

· Easy Air filter replacement.

Easy assessing design for all checking point.

National standard size large handrail.

Oil-water separator.

Big size tool box for various sundries.
Bump non-slip.

• Easy assessing Main Valve Block.
